

BOTANICAL SPECIALITIES

Cardamom Leaves

Cardamom leaves with woody, almost cinnamon notes, for infusing.

Cardamom Leaves are the leaves of the plant that gives cardamom, of the ginger family. Elongated and a deep green, they offer a woody, lightly sweet fragrance with hints of cinnamon. Their aroma comes out with heat: they are used in infusion, in a broth, a sauce or en papillote.

FLAVOUR

Woody, cinnamon, lightly sweet
