

CRESS & PLANT SPECIALITIES

Dried lichen

A dried lichen from the forests of Northern Europe, with a woody, wild note.

This lichen grows on tree trunks in the forests of Northern Europe. Harvested then dried, it is delivered in punnets. A natural association of a fungus and an alga, it brings a wild, Nordic touch to the plate: depending on the preparation, it is fried for a few seconds to become crisp, rehydrated in a broth or used as a decoration.

FLAVOUR
woody, forest floor

Seasons and origins

Available all year round in small quantities: to order, depending on arrivals.

Pack sizes

- **Punnet**

In the kitchen

- Fried for a few seconds, as a crispy garnish
- As a plate decoration, Nordic-style
- Rehydrated in a broth or an infusion
