

FRUIT

Cocoa pod

The fruit of the cacao tree: coloured shell and tangy white pulp around the beans.

The cocoa pod is the fruit of the cacao tree, oblong and ribbed, yellow, orange or red depending on the variety. Once opened, it reveals beans surrounded by a white, juicy and fragrant pulp. This pulp has a tangy taste reminiscent of lychee and citrus. A spectacular piece for chocolatiers, pastry chefs and dessert designers.

FLAVOUR

Tangy pulp, lychee and citrus

Seasons and origins

Available all year round in small quantities: to order, depending on arrivals.

Pack sizes

- **3 kg**

In the kitchen

- Pulp blended into juice or sorbet
- Beans and pulp in a chocolate-themed presentation
- Whole pod as a shop-window display
